Bureau of Entomology and Plant Quarantine  
Washington, D. C.

B. E. P. Q.--439, Supplement No. 1.

August 18, 1937.

PLANT-QUARANTINE IMPORT RESTRICTIONS  
OF THE  
KINGDOM OF SWEDEN

Through the courtesy of the Central Institute for Agricultural Research of Sweden it is possible to make the following modifications in the text of circular B. E. P. Q.--439, necessitated chiefly by the lack of the original texts involved.

1. The words "Great Britain, Greece, and Portugal" in the first item of the summary, page 4 of B. E. P. Q.--439, are to be stricken out, because the provision in question no longer applies to those countries.

2. The following note applying to the "Restrictions on the Importation of Seeds", page 13 of B. E. P. Q.--439, should be added as a footnote:

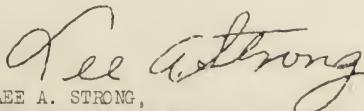

"As a generally applicable rule it may be stated that a license from the Kungl. Lantbruksstyrelsen (Royal Department of Agriculture) is required for the importation of all seeds, except seeds of ornamental plants."

3. The item 90 F and 90 H of article 1, Proclamation of March 18, 1921, under the caption "Import Permits Required", on page 14 of B. E. P. Q.--439, should be corrected to read:

"90 F Rye grasses (Lolium perenne and L. multiflorum);

90 H Turnips, carrots, swedes, and beets."

Item 90 I has been revoked and should be stricken out.

  
LEE A. STRONG,  
Chief, Bureau of Entomology and Plant Quarantine.
